## Kömmerling® profile system Kömmerling PremiSlide 76

The innovative sliding system, Kömmerling® PremiSlide 76 is ideal for glazing large openings. The open sash does not protrude beyond the window plane, allowing for maximum space saving

## Profile system advantages

The high degree of air-tightness when closing the sash ensures excellent thermal and sound insulation values. Even large sashes move easily and smoothly.

When the sash is set in ventilation mode, the burglar-proof characteristics of the fittings are preserved — which increases the overall security of the construction. Kömmerling® PremiSlide 76 sliding doors offer maximum comfort and maximum space availability
